

1. The used LLM tool

ChatGPT Default (GPT-3.5)

2. Motivation/reason to use LLM

- To solve some issues that occurred during the development.
- To get an assistance to code service2(Did not familiar with JavaScript)

3. How and why LLM helped

It helped me to sort out some issues in my code. Especially in service2. I am not that much familiar with the JavaScript

4. What kind of mistakes LLM did

It did not add the send a response back to the service1 from the service2.

5. What were things that LLM was not able to provide

I asked about how to get the IP address of service2 using Python. But it did not provide me an accurate answer.
