Outputs

```
O1- "uptime_output.stdout_lines": [
     " 20:23:27 up 4 days, 11 min,  0 users,  load average: 1.41, 1.42,
1.32"
    ]

O2- "uptime_output.stdout_lines": [
     " 20:24:10 up 4 days, 12 min,  0 users,  load average: 2.15, 1.62,
1.39"
    ]

O3- "uptime_output.stdout_lines": [
     " 20:25:22 up 4 days, 13 min,  0 users,  load average: 1.33, 1.51,
1.38"
    ]

O4- "uptime_output.stdout_lines": [
     " 20:26:51 up 4 days, 14 min,  0 users,  load average: 1.74, 1.56,
1.40"
    ]
```

Analyze

Output of uptime command was expectedly displayed.

Comments

1. Got errors when I tried to update git using ansible playbook. I had to change the Dockerfile by giving the sudoers access to the ssluser.
2. To avoid host key checking, I had to add host_key_checking=false into the ansible.cfg.
3. It was much easier to use separate ansible.cfg file and hosts file rather than using of default files in /etc/ansible location.
